The Future of Bio-Responsive Wellness

MAY 2026 • PITCH DECK FOR MUNDI VENTURES

The Wellness Gap: Why Current Solutions Fall Short

Static Content

Meditation apps offer "one-size-fits-all" audio that ignores the user's current physiological state.

Data Silos

Wearables collect millions of data points (HRV, HR) that are never used to personalize the experience.

Lack of Structure

Users are overwhelmed by thousands of random sessions with no clear path to progress or mastery.

ONDA Life: A Bio-Adaptive Path to Optimization

Real-Time HRV Biofeedback

Integration with Apple Watch and Bluetooth monitors to measure stress and coherence instantly.

8-Level Consciousness System

A structured journey from foundational breathing to advanced consciousness across 24 sub-levels.

Gamified Rewards (OND)

Virtual currency ecosystem that drives daily engagement and practice completion.

Adaptive Protocols

Sessions that automatically adjust based on your current biometric state for personalized biology.
